

Project

Integrated Green Cities/ InGreenCi – B2.11.04

Area of intervention: 1.1 Protection, Management and Promotion the Environmental Resources

Contract No. B2.11.04 / 20.03.2012

INVITATION FOR SEMINAR PARTICIPATION

On 20th and 21st of June 2013 Haskovo Municipality organizes a seminar on the following topic "Integrated Guidelines for the management of urban green areas." The seminar is held within the project "Integrated Green Cities / InGreenCi" of OP "European Territorial Cooperation Programme Greece-Bulgaria 2007-2013". The project is implemented in partnership between the Municipality of Haskovo, Municipality of Thessaloniki, Technical Chamber of Greece - Central Macedonia Section, Inter-Balkan Institute of Public Administration in Thessaloniki.

Project "Integrated Green Cities / InGreenCi" aims to promote integrated management of urban green areas with parallel education, awareness raising and mobilization of the affected human resources (engineers, ecologists, technicians, students, citizens), strengthening the sustainability of the congested urban area.

Within the project we have produced The Integrated Management of Green Areas in the city of Haskovo which contains technological maps, quantitative indicators to maintain one unit of green area, detailed technological requirements for maintaining the structural elements of the green areas and preparatory work for landscaping, including study analysis and preparation.

The seminar will be held in "Fantasia" complex with speaker Ivaylo Gogov – a landscape architect.

PROGRAM

June, 20th 2013 (Thursday)

09.00 - 09.30 Participants registration
